Welcome to Taabea Herbal, a market leading brand of herbal mixture in Kumasi since 2009.

Life is Too Short...

In the early 1900's, premature death was due mostly to communicable diseases...

Today death is mostly due to lifestyle related conditions. Bad eating habits, stress and lack of exercise often lead to heart disease, stroke, cancer, and diabetes.

Of the one million malaria deaths each year, 90% occur in Africa. We aim to help defeat malaria and prevent millions of unnecessary deaths. Much of the food we eat is not safe anymore due to the overuse of food chemicals and additives. Also we always pollute our environment with dirt that breeds mosquitos in our environment.

Since our inception, we are dedicated to sourcing top quality natural ingredients for our range of 78 full spectrum herbal remedies and essential supplements.

For our herbal products, only full potency ingredients are used in their original composition as they are found in nature, which enables us to provide high quality products which guarantee full natural strength, efficiency and safety. We always make sure our products are produced under hygienic conditions.
